

AWARDED AS
BEST DENTAL CLINIC
LONDON, 2019

MANZO CLINICA ODONTOIATRICA

FOUNDER E CEO DR. PAOLO MANZO

Dear Patient,

We want to thank you for your trust.
Your visit to our clinic will be without financial commitment
and it will take place like this:

- The doctor will visit you by examining the state of your teeth, of its occlusion, of the joints, of the skull and mandibular musculature of the face.

DURING THE FIRST VISIT:

- A panoramic radiograph or a telecranium or a CT scan will be carried out, only with your consent. This will be done to obtain an accurate assessment of your case in order to plan a correct therapy program.
- If you already have dental x-rays available, please bring them with you. We will evaluate if they are suitable for diagnosis or if there is a need for new tests. The cost of any radiographic examinations will be estimated, if necessary, before performing them.
- After analyzing all these data during the appointment, the doctors will present the treatment plan and the cost estimate designed to meet your needs.

For more information we are at your complete disposal.

HOW TO REACH US ON THE DAY OF THE FIRST VISIT?

AWARDED AS
BEST DENTAL CLINIC
LONDON, 2019

DR. PAOLO MANZO

CERTIFICATES OF EXCELLENCE

"After graduating in Dentistry, in 1997 I began my professional experience. After a few years, during the specialization in Orthodontics at the "Federico II" University of Naples, I started my first dental practice moved by a great passion for this subject and with the constant aim of treating my patients with cutting-edge techniques and excellence. Over time I have always continued, even with a PhD, to deepen the scientific aspects of my subject.

I have followed with dedication many children and adults who have expanded my experience. Some of those orthodontic treatments have allowed me to obtain national and international certificates of excellence. Today I have the honor of being invited to lecture at prestigious national and international universities to share my professional experience with colleagues from all over the world. Over the years a team of excellent specialists and collaborators has formed around me, each with a deep knowledge of their sector; with them I plan and share every therapy. Also thanks to my team I was able to transform the old practice into the current **MCO**, a multidisciplinary dental center of international importance. In the **MCO** there are cutting-edge technologies and a course area where we teach Italian and foreign doctors what we love to do. **MCO** today reflects my continuous pursuit of innovation and excellence in dentistry. "
